

## ASHER GOODMAN

Chicago, IL | 650-529-5791 | [acgoodman@uchicago.edu](mailto:acgoodman@uchicago.edu) | [www.linkedin.com/in/asher-goodman](https://www.linkedin.com/in/asher-goodman)

### EDUCATION

**The University of Chicago**, Chicago, IL

Bachelor's degree in Physics and Mathematics expected June 2028

### **Involvements**

UChicago Varsity Track & Field/Cross Country

**Menlo-Atherton High School**, Atherton, CA

*Diploma*, June 2024

GPA: 4.11/4

### **Honors**

AP Scholar with Distinction (2024), Rotary Award in the Industrial Arts (2024), CA State Seal of Biliteracy (2024)

### EXPERIENCE

#### **IFE STAR Internship at SLAC National Accelerator Laboratory**

*Research Intern*, June 2025 - August 2025

- Conducted research within SLAC's HEDS division on inertial fusion energy (IFE)
- Developed Python-based data analysis methods to evaluate outcomes of high-rep-rate laser irradiation experiments
- Collaborated with mentors to solve technical challenges and communicate results across a multidisciplinary research team
- Presented research findings at the IFE SURE Summer Symposium in Washington, D.C., a national forum for undergraduate fusion research

#### **UChicago High Lab**

*Research Assistant*, June 2026 - Present

- Learn nanofabrication techniques for quantum device development, including fabricating thin silicon implantation masks, creating pre-patterned diamond building blocks, and characterizing diamond-to-fused-silica bonding via X-ray diffraction
- Design fabrication-support hardware (Autodesk Inventor) for diamond nanofabrication workflows
  - A rotating axis for a micropositioner, improving alignment precision during diamond membrane transfer
  - A microscope slide holder enabling precise scoring and cracking of slides at the midpoint
- Train in structural simulation software (COMSOL Multiphysics) to support ongoing diamond transfer and bonding procedure development

#### **UChicago Pulse-A CubeSat Division**

*Structures Engineer*, November 2025 - Present

- Design structural and mechanical components for the Pulse-A 1U CubeSat (Autodesk Fusion)
- Perform FEA on CubeSat components (Ansys Mechanical)
- Manufacture frame components in machine shop
- 3D print visualization models
- Collaborate with an interdisciplinary team (mechanical, electrical, software, mission design, financing) to develop flight-ready subsystems

#### **Fleet Feet (Running Store), Menlo Park, CA**

*Sales Associate*, June 2022 - October 2024

- Communicated with customers to determine the shoe most suiting for their wants and needs

### LEADERSHIP

#### **MAHS Jewish Student Union, Atherton, CA**

*President/Leadership Board* August 2020 – June 2024

- Organized inclusive community meetings addressing hardships of the Israel-Palestine Conflict
- Celebrated Jewish holidays and initiated spirit events

### SKILLS

**Computer:** Proficient in CAD (Fusion, Inventor), Python, Microsoft Word, Excel, and PowerPoint

**Languages:** Conversational in reading and writing Spanish
